4"	0.015"	100'	\$95
4"	0.030"	100'	\$198
6"	0.015"	100'	\$146
6"	0.030"	100'	\$294

"I saved hours of refinishing work every week once I started using **CLEAN BRAKE** die cover film. The payback was immediate on other paying jobs instead of fixing a repeat problem."

(Stainless, 90 bend; 12 ga thickness)

Die marks that form on the outer edges when crafted with steel dies can be avoided with **CLEAN BRAKE** urethane die-cover film, ensuring a flawless form consistently.

**ASK US ABOUT
 PRESS BRAKE
 PUNCHES AND DIES!**

Refinishing decorative and pre-painted metals due to die marks can impact the profitability of your projects.

Enhance your shop's efficiency and profitability with **CLEAN BRAKE** urethane die-cover film, which eliminates die marks caused by your current metal dies.

HOW DOES THIS WORK?

CLEAN BRAKE urethane die-cover film forms a soft durable barrier between the pressure points of the brake punch and die eliminating the scuffing from metal on metal contact. Typically the length of die contact are is covered and then the press operation continues as normal. Thicker versions of **CLEAN BRAKE** are used for heavier gage applications.
